Art Unit: 2685

### **DETAILED ACTION**

### Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-31, drawn to an upconverter and its corresponding method for modulating an input signal to provide an output signal, classified in class 455, subclass 130.
  - II. Claims 32-35, drawn to an upconverter with its (separate) method for mixing a single-ended RF signal with a differential local oscillator to generate a differential IF signal (claiming a mixer with its detail circuitry), classified in class 455, subclass 143 or class 331(for oscillators and mixers).
  - III. Claim 36, drawn to an upconverter chip with its detail components, classified in class 455/252.1 or class 438 for a semiconductor chip.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I drawn to an upconverter and its corresponding method for modulating an input signal to provide

Serial Number: 09/656,172 Page 3

Art Unit: 2685

an output signal, classified in class 455, subclass 130. The subcombination has separate utility whereas invention II is about a (separate) method (even in a same upconverter, for a different intended use) for mixing a single-ended RF signal with a differential local oscillator to generate a differential IF signal (claiming a mixer with its detail circuitry), classified in class 455, subclass 143, and claim 36, drawn to an upconverter chip with its detail components, classified in class 455/252.1; because invention I and inventions II, and III disclose an upconverter with its components, or a semiconductor chip, and then with separate techniques for intended use in that device. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III, Group IV and Group V, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2685

Conclusion

Page 4

6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony T. Nguyen whose telephone number is (703) 308-5860. The examiner can normally be reached on Monday-Friday from 9:00 AM to 6:30 PM, with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Urban, can be reached at (703) 305-4385.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is **(703) 306-0377**.
